

# Europump conference Ecodesign

Dr. Brodersen  
Europump President  
7 March 2013  
Brussels

## *This meeting*

- How to apply Ecodesign regulations in the pump industry?
- For people dealing with pump matters
- Be bold, ask questions, interact

# *Programme part 1: background info*

- **Ecopump work by Europump : how the concepts of “house of efficiency” and “Extended Product Approach” were developed and what they meant for ecodesign developments**
  - by Professor Bernd Stoffel, University of Darmstadt representative
  - Frank Ennenbach, Europump Standards Commission Chairperson, Sulzer Pumps
- **Ecodesign regulations: what is the reasoning behind them? What are the challenges ahead?**
  - by Ismo Gronroos-Saikkala, Head of Sector, Energy efficiency of products, Energy Directorate General, European Commission.

# *Final Programme part 2: hands on sessions*

- **Circulators: How to apply European Commission Regulation 641/2009/EC and the amendment 622/2012/EC** with regard to ecodesign requirements for circulators: what is in the Regulation? What is in the standard? Which Guidelines are available from the EC and Europump? Examples of application of the Regulation
  - Dr Niels Bidstrup, Grundfos, Europump, CEN/TC 197/WG 2 Chairperson
- **Water Pumps: How to apply European Commission Regulation 547/2012/EC implementing Directive 2009/125/EC** with regard to ecodesign requirements for water pumps: what is in the Regulation? What is in the standard? Which Guidelines are available from the EC and Europump? Examples of application of the Regulation
  - Markus Teepe, WILO, Europump, CEN/TC 197/WG 1 Chairperson
  - Marcos Gonzalez-Alvarez, Policy Officer, Energy Directorate General, European Commission
