

The Voice of the European Pump Industry

The Europump conference on how to apply Ecodesign regulations scheduled for 7 March 2013 – Save the Date!

The conference will bring together various stakeholders (European Commission, pump manufacturers, CEN Working Group Chairpersons) to discuss openly the implementation of the Ecodesign regulations for water pumps and circulators.

Brussels, 7 December 2012

“Participants will discuss the implementation of Ecodesign Regulations for the pump industry in particular for water pumps and circulators” says Guy Van Doorslaer, Europump Secretary General. “Our event aims to help European pump manufacturers implement correctly the Ecodesign regulations for these products.”

The meeting will take place in Brussels, Belgium from 10:00 to 16:30. The morning session will focus on the general aspects of Ecodesign. Two breakout sessions will be organised in the afternoon on how to apply European Commission Regulation 641/2009/EC and the amendment 622/2012/EC with regard to ecodesign requirements for circulators, and how to apply European Commission Regulation 547/2012/EC implementing Directive 2009/125/EC with regard to ecodesign requirements for water pumps. These sessions will look in detail at what is in the Regulations and standards. Speakers will explain which guidelines are available from the European Commission and Europump and explore their content.

Participants will be asked to bring their questions to ensure that this event provides real added value for them.

About Europump: *Europump, the European Association of Pump Manufacturers, was established in 1960. It represents 18 National Associations in 15 EU Member States, Turkey, Russia & Switzerland. Europump members represent more than 450 companies with a collective production worth more than €10 billion and employing 100,000 people in Europe. The ever improving performance of liquid pumps increases the productivity of end user sectors and contributes to competitiveness and growth. Pump manufacturing is a growing and SME-driven sector. With almost half of all world exports and 40% of major patent applications, the Western European pump industry is the economic, commercial and technological leader. Europump's ID in the Commission Register of Interest representatives is: [07655452075-36](#)*
